

Abdul Kader Bahri

Professional Summary

Accomplished framework agnostic Frontend Engineer with a decade of experience delivering effective solutions in a variety of frontend technologies. Ability to make strategic decisions that balance UX with performant code. Comfortable working independently or in diverse team settings. Adaptable to meet the needs of any organisation, bringing a fun and friendly approach built on honesty, hard work and trust.

With a solid track record of coaching and mentoring team members, my experiences span a wide array of roles and responsibilities, providing a proactive approach to problem-solving. I excel in a fast paced environment, rising to the challenge with a positive attitude, whilst bringing the team along the journey.

Employment History

GTMaritime, Warrington — June 2025 - Current — *Senior Frontend Engineer*

- Introducing and Implementing CI/CD within the organisation with assistance from infrastructure.
- Highlighting areas for improvement and collaborating with the team leads to ascertain a path to implementation.
- Creating and implementing a design system for use of a greenfield project, built for Vue3 using StorybookJS.
- Led migration of a greenfield project from AstroJS to Nuxt4/Vue3.
- Set coding and process standards including the addition of TypeScript and refactored greenfield projects to abide by said standards whilst aligning staff and code output to follow these.
- Working with product and UI/UX to scope, assign and deliver project requirements.
- Mentoring of a Mid-Level frontend engineer working on interpersonal, organisational, communicational and hard skills.
- Introducing Agile rituals to a business that is new to agile working
- Working with the product team members and team leads to introduce a robust and flexible process eliminating issues with communications aimed at fostering a more collaborative approach to projects at all stages.

Ultimate Performance, Manchester — January 2022 - February 2025 — *Senior Frontend Engineer*

- Managed and led development of a performant, clean and widely adopted Design System & Component Library whilst collaborating in a multi-discipline team written in svelte.
- Managed and led development of a frontend for an internal system named 'Client Onboarding Management System' With the addition of TypeScript using the aforementioned design system and component library within SvelteKit.
- Created, tested and deployed to production a client-facing consultation booking and management system, written in VueJS/Nuxt3 with TypeScript using the latest conventions with state management which uses multiple external separate in-house APIs enabling a more premium feel for the acquisition flow resulting in a net positive effect on completion rates of circa 5%.
- Built multiple Web Components key to fulfilling business goals, including a dynamic consultation journey within the main site, exporting forms from the main site to SPA Components for reuse in multiple places Within ReactJS.
- Built the internal tooling for frontends allowing developers to push to AWS with Cloudformation using the third party tool 'SST' (CDK Wrapper).
- With direction of DevOps, created and refined CI/CD pipelines, automating e2e and Unit test runs.
- Mentored a Mid-Level and Junior SWE with frontend technologies ensuring quality and standards were adhered to introduced e2e and unit testing..
- Complete multiple under-the-hood rebuild of the company main site bringing load times from 10s to under 2s, through extensive refactor, and consolidation and simplification of the frontend and backend whilst maintaining SEO scores.
- Worked on maintaining existing React applications, ensuring they are up to date and align with current and new company requirements.

Gooley Creative, Manchester — September 2015 - January 2022 — *Frontend Engineer*

WordPress Development within a fast paced environment creating bespoke experiences for individual client needs with projects from microsites to performant E-Commerce platforms - over 100 websites built using frontend technologies such as react and vue, powered by Wordpress

Led and managed a team of four to completely transfer ownership, retool and rebuild a large scale poster site whilst modernising the tech stack and creating guidelines and processes for smooth operations. Orchestrated and led development of ADA Compliance rollout to AA Standard.
