Abdul Kader Bahri

Professional Summary

Senior Frontend Engineer with 10+ years' experience building accessible, high-performance web applications and design systems across React, Vue, and Svelte. Proven track record improving CI/CD workflows, mentoring engineers, and delivering customer-facing products in fast-paced environments.

Employment History

GTMaritime, Warrington — June 2025 - Current — *Senior Frontend Engineer*

- Introduced CI/CD for frontend applications in partnership with the Infrastructure team, improving reliability and repeatability of deployments.
- Defined frontend engineering standards (TypeScript adoption, coding conventions, review practices) and led refactors to align greenfield projects to them.
- Designed and built a Vue 3 component library and design system with Storybook to support a new greenfield platform.
- Led a migration of a greenfield project from Astro to Nuxt 4 / Vue 3 to improve maintainability and delivery speed.
- Collaborated with Product and Design to scope work, break down requirements, and deliver user-facing features iteratively.
- Mentored a mid-level engineer across technical delivery, communication, organisation, and stakeholder management.
- Introduced Agile rituals and improved cross-team communication to reduce ambiguity and increase delivery cadence.

Ultimate Performance, Manchester — January 2022 - February 2025 — *Senior Frontend Engineer*

- Led development of a shared design system and component library in React, adopted across teams to improve consistency and reduce build time.
- Lead, developed and delivered to production an internal Client Onboarding Management System in NextJS with TypeScript using the design system, improving internal workflows.
- Delivered a client-facing consultation booking and management experience in Nuxt3 / Vue with TypeScript, increasing completion rates by around 5%.
- Built reusable Embeddable Web Components to support cross-app journeys and A/B testing with React, enabling consistent experiences across platforms.
- Developed internal tooling to streamline frontend deployments to AWS using SST (CDK wrapper) and CloudFormation.
- Implemented and refined CI/CD pipelines with DevOps, automating unit and E2E test execution to improve release confidence.
- Reduced main site load times from roughly 10s to under 2s through refactoring, simplification, and performance optimisation while maintaining SEO.

Gooey Creative, Manchester — *September 2015 - January 2022* — *Frontend Engineer*

- Delivered 100+ bespoke client websites and e-commerce builds using WordPress and modern frontend tooling (React/Vue) in a fast-paced agency environment.
- Built performant, SEO-friendly experiences ranging from microsites to large-scale e-commerce platforms.
- Led a team of four to take over, modernise, and rebuild a large poster e-commerce site, including new processes and engineering guidelines.
- Drove an accessibility compliance programme to WCAG 2.2 AA across a client estate, coordinating implementation and QA.
- Worked directly with clients and stakeholders to translate requirements into shipped features, balancing UX, feasibility, and timelines.
- Established repeatable development workflows and handover practices to improve quality and delivery predictability.

ADDRESS & CONTACT

Manchester, UK
Tel: +44 7712 283182
Email: hello@abdulthedev.uk
Website: abdulthedev.uk

HARD SKILLS

- TypeScript / JavaScript
- React, Vue, & Svelte
- Next.js, Nuxt & SvelteKit
- PHP, CSS & HTML
- REST APIs
- CMS & Headless integration
- Bitbucket & GitHub
- CI/CD
- Cypress/Vitest - E2E, Unit Testing and TDD
- Design system & UI Build
- Sentry, RUM
- Figma (Primary)
- Storyblok
- WordPress

SOFT SKILLS

- Client & stakeholder communication
- Project management
- Development leadership
- Mentorship & Collaboration
- Agile, Waterfall, Kanban & Shape Up
